ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: METHODS AND MEANS FOR NUCLEIC ACID SEQUENCING

(57) Abstract: Nucleic acid sequencing, especially high-density fingerprinting, in which a panel of nucleic acid probes is annealed to nucleic acid containing a template for which sequence information is desired, with determination of the presence or absence of sequence complementary to each probe within the template, thus providing sequence information. A reference sequence at least partly related to the template is used.
